

The Madison SystemTM

MADISON ASSOCIATESTM

Madison AssociatesTM develops, supports and distributes The Madison SystemTM, software for the risk management and administration of commercial loan portfolios, with an emphasis on commercial real estate loans.

Technology

The Madison SystemTM is a browser-based application that may be hosted on client or third party servers. Eliminate silos of information – share information with all authorized users regardless of location.

System Benefits

The Madison SystemTM will help you to cost-effectively *identify*, *measure* and *manage* the risk of your commercial loan portfolio. Increase your origination capacity without increasing staff.

More Information

For more information call (781) 639-8171 or visit us at: www.madisonassociatesllc.com.

The Madison SystemTM is designed for commercial loan portfolios with an emphasis on commercial real estate loans. It includes three products: Loan Origination, Portfolio Management, and Loan Review. All products are fully integrated. Select one or all systems, and configure them to your business practices.

Madison Loan Origination

Madison Loan Origination tracks each loan through every step of the origination process from the initial customer inquiry to closing. Benefit from production reports, productivity reports, loan sizing analysis, and committee presentations including photographs and credit analysis.

Madison Portfolio Management

Madison Portfolio Management is a comprehensive set of tools, analytics and reports for portfolio risk management and administration. It includes stress tests, ticklers to keep information current, loan migration analysis, operating statement detail, regulatory reports, and more.

Madison Loan Review

Madison Loan Review supports the independent loan review of commercial loan portfolios. Select and evaluate the sample, record loan review results, save review documentation, and produce loan review status reports.

Madison Reports

Select from a library of over 150 reports that put all your information at your finger tips. Reports include graphs, summary and detail tables, drill down, and can be exported to Excel, PDF, Word and other file formats. All reports are presentation ready.

Madison Import

Madison Import effortlessly imports data from loan servicing, accounting and other systems.
